PROFESSIONAL SUMMARY

Aspiring AI/ML, Blockchain, and Backend Developer pursuing an MSc in Information Technology at ISTAR, CVM University, with a Bachelor's in Information Technology from P P Savani University. Hands-on experience building machine learning applications, decentralized applications (DApps), and backend systems using Python, Django, ASP.NET Core, Solidity, and Web3. Practical exposure to cloud infrastructure and DevOps tooling — including AWS EC2, Docker, Docker Compose, Nginx, and Linux — gained through independent projects and a blockchain development internship at Niqox.

EDUCATION

ISTAR, CVM University

July 2025 – April 2027

Institute of Science & Technology for Advanced Studies & Research

Master of Science in Information Technology (In Progress) | CGPA: 7.65 / 10

P P Savani University

June 2022 – June 2025

Bachelor of Information Technology | CGPA: 6.7 / 10

National Institute of Open Schooling

June 2020 – May 2022

XII (PCMB)

K B Patel English Medium School

June 2008 – May 2020

X

TECHNICAL SKILLS

- **Cloud & DevOps:** AWS (EC2), Docker, Docker Compose, Nginx, Linux
- **Programming Languages:** Python, JavaScript (Node.js), C#, Solidity, Bash
- **Frameworks & Libraries:** Django, ASP.NET Core MVC, Entity Framework Core, OpenCV
- **Blockchain:** Solidity, Web3, IPFS (Pinata), Smart Contracts, Decentralized Applications (DApps)
- **Databases:** MongoDB, Mongo Express
- **Tools & Platforms:** Git, GitHub, Docker Hub
- **Core Concepts:** Data Analysis, Data Mining Techniques, Artificial Intelligence Fundamentals

PROJECTS

Blockchain-based Land Registry DApp — Solidity, Web3, IPFS (Pinata), Smart Contracts

- Built a decentralized application enabling secure registration, verification, and transfer of land ownership records on-chain, removing dependence on centralized record-keepers
- Used Solidity smart contracts to enforce tamper-proof, transparent ownership transfers, with documents stored via IPFS (Pinata) for decentralized, verifiable storage

Driver Drowsiness Detection System — Python, OpenCV, Computer Vision

- Built a real-time driver drowsiness detection system using computer vision to continuously monitor eye movement and facial features
- Applied OpenCV-based facial landmark tracking to flag signs of fatigue, aimed at helping prevent accidents caused by drowsy driving

Expense Tracker Web Application — ASP.NET Core MVC, Entity Framework Core, C#

- Developed a secure web application for managing and categorizing daily income and expenses
- Implemented data persistence and business logic using Entity Framework Core within an ASP.NET Core MVC architecture

Online Examination System — Django, Python

- Built a web-based examination platform enabling administrators to create exams, manage question banks, and monitor student performance

- Developed using Django's MVT architecture to handle exam configuration, question management, and results tracking through a unified interface

CERTIFICATIONS

- Software Engineering: Software Design and Project Management
- Software Engineering: Modeling Software Systems using UML
- Software Engineering: Implementation and Testing
- AI-Driven Software Development — SVNIT Pantech e-Learning

PROFESSIONAL EXPERIENCE

Niqox — Blockchain Developer

Dec 2024 – Apr 2025

Surat, India

- Developed a blockchain-based Land Registry DApp using Solidity to securely register, verify, and transfer land ownership records
- Integrated IPFS (Pinata) for decentralized document storage and implemented smart contracts to ensure transparent, tamper-proof ownership records
- Built a library backend system on Web3, applying blockchain principles to real-world data management

ACHIEVEMENTS & ACTIVITIES

- Developed
- Participated in Gyanotsav and other university-level events during MSc. IT
- Served as Class Representative (CR), NSS Secretary

SOFT SKILLS

- Problem Solving
- Team Collaboration
- Communication Skills
- Time Management
- Adaptability
- Quick Learning Ability

LANGUAGES KNOWN

- English
- Hindi
- Gujarati
